Jacob Terstriep Receives Presentation Award

Jacob Terstriep, Business Systems Analyst at Adams, recently received the MIC Member Experience Award for his presentation titled *LeadAgent with Real-Time Integration to iVUE* at the 2016 Member Information Conference (MIC) held August 13 in St. Louis.

The MIC is the National Information Solutions Cooperative's premier learning event and is designed to help technology partners leverage their capabilities and streamline operations. For decades, it has brought tens of thousands of members, customers, and prospective clients together to discuss and share technology insight.

Terstriep's award-winning presentation was voted one of the top five weekly sessions by conference attendees. Only member presenters who went above and beyond were personally recognized with a MIC Member Experience Award.

Adams has over 60 years of experience in the telecommunications industry, providing telephone, television, and broadband Internet services in places where there was previously little or no coverage. The company is well known for business communication, Internet offerings and for investing in communities to further economic development.
