

Quick Start Guide:

Setting up your Wi-Fi and App

- 1 Download the app. You can search either the Apple App Store or Google Play Store for "FollowMyNetwork", then install it on your mobile device.

- 2 Select "SIGN UP" towards the bottom of the screen.

The screenshot shows the 'FollowMyNetwork Login' screen. It features a house icon at the top right. Below the title, there are input fields for 'Email Address' and 'Password' (with an eye icon for visibility). A 'Location' dropdown menu is set to 'USA'. A 'Forgot Password?' link is below the location. At the bottom, there is a blue 'SUBMIT' button and a link that says 'Don't have an account? SIGN UP'.

- 3 Enter your personal information. The password you enter here will be used to access the app.

Note:

Please wait at least 10 minutes after your BLAST GigaSpire has been 'turned up' before attempting step 4.

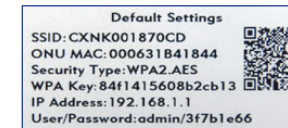

The screenshot shows the 'FollowMyNetwork Registration' screen. It features a house icon at the top right. Below the title, there is a house icon and text: 'Create your account so this app can communicate with your home network.' and 'Please use a secure password as this app allows changes to your home network.' There are input fields for 'First Name', 'Last Name', 'Email Address', and 'App Login Password' (with an eye icon). A blue 'SUBMIT' button is at the bottom.

- 4 If your system is plugged in and connected select "Yes" to continue.

Otherwise select "Not Sure?" at the bottom of the screen and skip to steps 4a-4e on the next page to get things connected.

The screenshot shows the 'FollowMyNetwork SetUp' screen. It features a house icon at the top right. Below the title, there is a house icon and text: 'Let's continue with the setup of your new system.' and 'Is your new system plugged in and connected?'. At the bottom, there is a blue 'YES' button and a link that says 'Not plugged in? Not sure?'.

- 5 Tap the QR code that appears within the app. (You will be asked to allow the app to access your camera.) Point your camera at the QR Code found on the bottom of your BLAST GigaSpire, or on the sticker that came in your box (example shown below). Select OK. After you select "Submit", you may be asked to enter your account number.

The screenshot shows the 'Router - Configuration' screen. It features a house icon at the top right. Below the title, there is a house icon and text: 'Please Scan QR code from router QR enter details below'. There is a 'Scan QR code' field with a QR code icon. Below that, there is an 'Or' option and 'Enter router details' section with fields for 'MAC Address' and 'Serial Number'. At the bottom, there is a blue 'SUBMIT' button.

- 6 **Note:** If your system is already operating with Wi-Fi, tap the "Click here to skip" text. Otherwise, complete these steps to set-up your Wi-Fi.

Name your network and create a password.

- The Router Name will be used throughout the app.
- The Network Name (SSID) is what you will use as your wireless connection name.
- Select a password for your wireless network, if you do not want to change it on all the devices in your home, use your existing wireless SSID and Password from your current router.

The screenshot shows the 'FollowMyNetwork Network Details' screen. It features a house icon at the top right. Below the title, there is a house icon and text: 'Wireless already working? Click here to skip'. There are input fields for 'Router Name' and 'Network Name (SSID)'. Below that, there is a dropdown menu for 'AES' and input fields for 'Wi-Fi Password' and 'Confirm Password' (both with eye icons for visibility). At the bottom, there is a blue 'SUBMIT' button.

Getting started with the App

The App allows you to manage your home or small business Wi-Fi network. You can self-install and be managing your home or business within a few minutes. Download the app and start managing your home network today!

Quick Start Guide:

In-app Wiring Guide

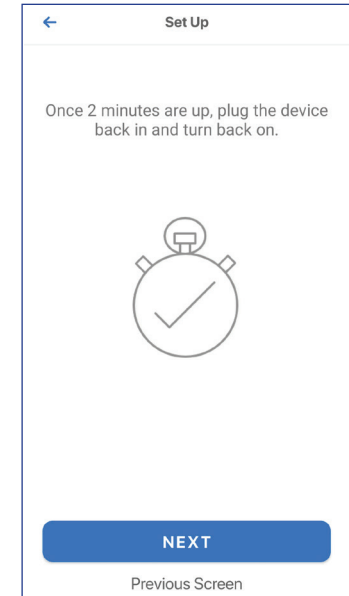

- 4a** It's time to setup your new system. Locate your existing internet service device. This is typically known as a modem or ONT. It may look like one of these.

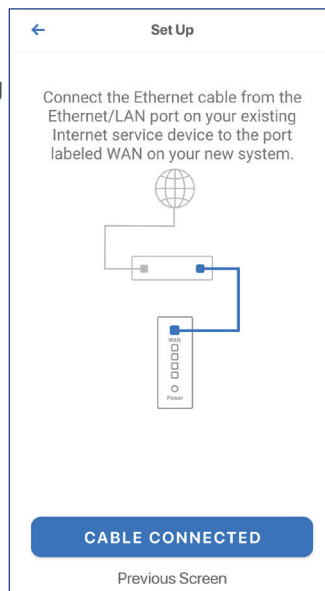

- 4b** Unplug the device and remove all cables. Wait 2 minutes.

- 4c** After 2 minutes, plug the device back in and turn it on.

- 4d** Connect the ethernet cable from the ethernet/LAN port on your existing internet service device to the port labeled WAN on your new system.

- 4e** Now, connect your new system to a power outlet. It may take several minutes for the unit to be ready. It will show a solid blue light. Once the device is connected, tap "Unit Ready."

Go back to step 5 on the previous page.
